

## STREET BORE PROCEDURES

1. No street bore shall be issued without prior approval from the City Street Inspector or a Public Works official, a (4) four-hour advanced notice is required by the Public Works Department. Only after approval is received will a permit be issued, permit cost is (\$10.00) ten dollars and there will be no exceptions to this requirement.
2. A (\$500.00) five hundred-dollar cash surety bond must be posted with the City of Springdale, Public Works Department before any street may be bored.  
(269 Randall Wobbe Lane, Springdale Arkansas 72764) (479) 750-8135
3. Work zones to meet MUTCD regulations must be set up at all street bore location to insure worker, traffic and safety.
4. There must be an on site inspection by the City Street Inspector before a permit can be issued.
5. The minimum depth for a street bore is (30") thirty inches depending on the size of the utility.
6. The City Street Inspector must be notified before any boring is done. No boring shall begin without the presence of the inspector. Normal working hours are from 7:30 AM to 4: 00 PM. Any party needing to make an emergency street bore after these hours must call cell phone # 479-601-4273 for the City Street Inspector. A \$15.00 dollar per hour charge will be assessed to all after hour call outs, in addition to the normal charges.
7. Pits must be left open until the final inspection is completed by the Street inspector.
8. The party making the bore shall be responsible for the cost of any repairs to the City Street; if any damage should occur during the boring process and for the future repairs due to settling of the street caused by the boring, if it should occur.
9. The deposit of cash or surety bond shall be returned to the applicant after (90) days or the permanent repair is completed and the City has received payment for the repair.
10. This Permit does not allow for any open cutting of the street.
