

EMS committee Minutes- 10-20-16

Attendance- Vaughn, Hales, Bitner, Crabbe, Guthrie, Reid, Bagley, Kidd, Kehrli, Carter, Granger, Wormington

Called to order by Chair Person.

Troponin Kits were talked about. Everyone wants them, just need to have the rep give a sales pitch. Granger and Bagley are assigned to further investigation.

Hemostatic bandages were talked about again. Capt Z is assigned to further investigation and proposal for next meeting. We need a recommended type of bandage to go with supported by a national standard.

Stocking lists. Chief Vaughn will send out an email of the approved EMS station lists. Matt Bagley will follow up with this to make sure it happens and is posted in all EMS supply rooms.

Inventory lists of ambulances. Zedok and Guthrie will put those together and be in charge of making the changes final. These need to be posted on Imagetrend for all to see.

Code Stat- Talked about the use of an already purchased piece of data tracking for CQI. Bagley, Granger and Chief Vaughn are assigned to the implementation of this software.

Lucas device. Proper use, inspection, maintenance . Kehrli is assigned to this task.

Spare Chords for laptops in Medic units. Reid is assigned to making this happen.

Magnum Yankauer tips. Guthrie and Bitner will get together for purchasing this.

Ideas and suggestions for thought:

Idea brought up about intubation skills not up to par. Getting a new mannequin or some sort of outside training would be nice. ATERF cadaver lab was awesome. Something to get our hands on more realistic practice.

Bagley wants data brought to the table, not just ideas. Make it happen!

Motion to Adjourn- Reid, Second Kehrli

Adjourn!
